

# Dotfiles

The dotfiles I am currently using on Arch Linux

## Currently in use:

- xfce4
- i3-gaps
- zsh
- pywal
- polybar
- neovim (with vim8 plugins)
- compton
- rofi (launcher/window swapper)
- kitty (terminal)
- libinput-gestures
- tlp (power management)
- stow + git (dotfile management)
- fireshot (screenshots)
- vifm (vim style file manager)
- mpd + ncmpcpp (music player)

## Requirements

- i3-gaps
  - Autorun/Startup
    - \* pywal
    - \* feh
    - \* compton
    - \* alternating\_layouts.py
    - \* flashfocus
    - \* nm-applet
    - \* polybar (with scripts)
    - \* libinput (may require libinput gestures as well)
    - \* blurwal
    - \* redshift
  - fireshot (screenshot bindings)
  - kitty (main term)
  - tmux (dropdown multiplexer)
  - pulseaudio (audio controls)
  - rofi (launcher/workspace swapper)
- polybar
  - pulseaudio (module)
  - pavucontrol (open pulseaudio controls)
  - connman

- cmst
  - i3wm
  - fonts: inconsolata, font awesome 5, hack
- kitty
  - pywal
  - san francisco mono (font)
- vifm
  - ueberzug (previews in vifm, see config for specific details)
  - ffmpegthumbnailer
- neovim
  - asynccrun.vim
  - auto-pairs
  - coc.nvim
  - goyo.vim
  - nerdcommenter
  - nerdtree
  - tabular
  - vim-airline
  - vim-auto-save
  - vim-bookmarks
  - vim-pandoc
  - vim-pandoc-markdown-syntax
  - vim-pandoc-markdown-preview
  - vim-surround
  - vintex
  - vpmp-toggable (modified vim-pandoc-markdown-preview)
  - wal.vim (theme that works with pywal)
